

The confidence to navigate any market cycle

Our time-tested, data-driven methodology gives you factual and unbiased insight into the strength of markets, sectors, industries and individual securities to help you generate alpha and reduce risk in any market environment.

A Foundation Built on Unbiased Technical Analysis

We monitor hundreds of indicators across dozens of global equity markets, giving you unbiased market insight free from personal opinions.

KEY TECHNICAL INDICATORS

Supply & Demand

Our proprietary indicators for Buying Power and Selling Pressure give intermediate and long-term measurements of the effect of buyers and sellers on stocks.

Market Breadth

Our proprietary indicator of Operating Companies Only (OCO) gives you the most accurate measures the internal strength or weakness of markets.

Market Momentum

Indicators identify market participation, specifically the percentage of stocks that are in upward or downward trends.

A technical research team on your desktop

Lowry OnDemand is an easy-to-use platform that turns complicated data into actionable insights for investment professionals.

Commentary

Morning Commentary
Tuesday, April 8, 2025 - For investors interested in relative safety and strength, Consumer Noncyclicals and Utilities fit the bill. For potentially powerful snapback rallies, which would depend on the return of robust Demand, the most oversold Sectors could be candidates.

Afternoon Analysis
Tuesday, April 8, 2025 - Stocks soared at the open Tuesday but then began a relentless slide into the abyss. The DJIA closed 1781 points below its high for a 0.84% loss. The S&P 500 shed 1.57% while the Russell 2000 dropped 2.73%. The S&P Technology Sector fell over 2% after being up over 4% early. Down Volume was 88% of NY...
